- ④ Preventive & Corrective Maintenance of all sort of Rotary Equipment such as Turbines (Gas and Steam), Compressors, Pumps, Boilers, Valves, Bearings, Generators, Gears etc.
- ④ Refurbishment and supply of spares for all sort of Rotary Equipment such as Turbines (Gas and Steam), Compressors, Pumps, Boilers, Valves, Bearings, Generators, Gears etc.
- ④ Refinery Maintenance including Sulphur Handling Plants
- ④ Vibration Analysis and Condition Monitoring Services

# Ventura Technical Maintenance L.L.C.

## Services

### Major Overhauls

We are fully equipped to perform complete overhauls of all types of rotary equipment during emergency shutdowns and planned turnarounds, staffed and resourced by customer focused engineers with several years of experience and expertise, clients can benefit from a comprehensive quality service on repairs, refurbishments and engineering capabilities with rapid turnaround time.

### Routine Plant Maintenance Services

We have considerable experience and expertise to undertake all types of operational and maintenance projects for the power, oil & gas, petrochemical industry. With our significant technical experience, we deliver a custom-made project package that meets customer quality and efficiency targets.

### Mechanical Field Services

A team of highly experienced mechanical specialists provide maintenance/troubleshooting of various mechanical processes with their hands on knowledge of Compressors, Steam and Gas Turbines. Our teams are headed by specialized Technical Advisors who have in-depth knowledge of Turbines and Rotating Equipment, these engineers are available to assist with routine as well as preventative maintenance, troubleshooting and resolving machinery and plant issues during unplanned outages.

### Spare Parts

VTM with knowledge from their established supply chain provides a range of spare parts for various machines in the industry having a proven track record of providing upgraded parts and repairs on components to well established industry leaders.

The spare parts inventory is closely monitored to ensure complete customer satisfaction for quality and availability during emergency outages which encompasses the below:

- 24 hour Global Service
- Industry Standard Warranties
- In Situ Repairs Service
- Installation/Commissioning Service
- Component Exchange

### Vibration Analysis and Alignments

VTM support brings extensive balancing experience to all plant and virtually every type and size of rotor – be it Gas Turbines, Paper Mill Rolls, Expander Turbines/ Compressors to Conventional Fans. For Vibration services offered at the plant, the process is managed by experienced machinery diagnosticians and backed by investment in the latest technology by our partners.

To further support our customers, our partners also provide Laser Alignment services, Infrared Thermography, Lube Oil analysis which can be assisted with flexible service programs or Emergency Call Out services.

### Our Major Clients

- Masood John Brown
- Osborne Engineering Limited
- Masood John Brown Power Solutions
- DePretto
- Quartz Elec
- Siemens
- Turbomachinery
- Gulf Petrochemical Industries Company
- Bahrain Steel
- Bahrain Petroleum Company
- Bahrain National Gas
- Hoerbiger
- ENGIE
- DUGAS
- ADNOC
